

Doc 2: EzRewards Website Structure and Copy

Website Goal

The goal of the EzRewards website is to create awareness, explain the product clearly, and convert interested companies into waitlist sign-ups.

Primary CTA:

Join the Waitlist

Secondary CTA:

2. Home Page Structure and Copy

Section 1: Hero

Eyebrow

Employee appreciation, redesigned.

Main Headline

The operating system for employee appreciation.

Subheadline

EzRewards helps companies recognize great work, reward employees, manage voucher redemptions, and understand appreciation trends — all from one modern platform.

Primary CTA

Join the Waitlist

Secondary CTA

Explore Product

Supporting Line

Built for growing teams that want appreciation to be visible, structured, and effortless.

Design Notes

Use a premium hero layout with bold typography. The hero can show floating UI cards:

- Recognition card
- Wallet balance card
- Voucher redemption card
- AI Report Assistant card

Suggested visual card examples:

- "Ananya recognized Rahul for Ownership"
 - "Wallet Balance: ₹1,24,500"
 - "Top Badge: Problem Solver"
 - "Ask AI: Which department recognized the most this month?"
-

Section 2: Problem

Headline

Appreciation is happening. But most companies cannot see it.

Copy

Every company has moments worth recognizing. A teammate goes beyond their role. A manager solves a crisis. A team ships something difficult. But most of these moments disappear into chats, calls, emails, and memory.

Rewards are often handled manually. Recognition is scattered. Reports are missing. HR teams are left managing appreciation through spreadsheets and follow-ups.

EzRewards brings it all together.

Problem Cards

Recognition is scattered

Great work gets acknowledged in chats, calls, and meetings — but rarely becomes part of company culture.

Rewards are manual

Vouchers, budgets, approvals, and redemptions often depend on spreadsheets and back-and-forth coordination.

Visibility is limited

Leaders know rewards are being distributed, but they cannot easily see participation, trends, or impact.

Section 3: Product Promise

Headline

Turn everyday wins into visible culture.

Copy

EzRewards gives companies a structured way to recognize people, reward contributions, and track appreciation across teams.

From peer recognition to wallet-backed rewards and reports, EzRewards helps make appreciation a repeatable operating system — not a one-off activity.

CTA

Join the Waitlist

Section 4: How EzRewards Works

Headline

Recognition, rewards, and insights. In one flow.

Step 1: Recognize

Employees and admins can recognize people with badges, appreciation messages, reactions, and comments.

Step 2: Reward

Admins can enable digital voucher-based rewards through a company-funded wallet.

Step 3: Redeem

Employees can redeem vouchers from the available catalogue.

Step 4: Track

Admins can track recognition, wallet usage, redemptions, and employee participation.

Step 5: Ask AI

Admins can ask the AI Report Assistant questions about report data and get clear answers instantly.

Section 5: Feature Highlights

Headline

Everything you need to run employee appreciation.

Feature Card 1: Peer Recognition

Make appreciation visible across the company with public recognition posts, badges, reactions, and comments.

Feature Card 2: Digital Rewards

Let companies reward employees through digital vouchers and coupon-based redemption flows.

Feature Card 3: Company Wallet

Fund employee rewards through a dedicated wallet and track balance, recharge history, and utilization.

Feature Card 4: Admin Controls

Manage users, invites, roles, subscriptions, wallet, and employee access from one admin layer.

Feature Card 5: Reports

Understand recognition activity, employee participation, wallet usage, and redemption trends.

Feature Card 6: AI Report Assistant

Ask questions on top of report data and get clear answers without manually reading every table.

Section 6: AI Report Assistant

Headline

Ask your reports. Get answers.

Copy

Reports are useful. But reading them takes time.

The AI Report Assistant helps admins ask natural language questions on top of structured report data.

Ask:

- "Who are the top recognized employees?"
- "Which department has the lowest participation?"
- "What vouchers were redeemed the most?"
- "How much wallet balance is available?"
- "Are there any failed redemptions?"

EzRewards turns report data into quick answers your team can act on.

CTA

Join the Waitlist

Design Notes

Show a chat interface mockup beside report cards.

Example chat mockup:

Admin:

Which department had the highest recognition this month?

AI Report Assistant:

Engineering had the highest recognition activity with 326 recognitions, followed by Product with 214 and Sales with 170.

Section 7: Built for Growing Companies

Headline

For teams that are too big for manual appreciation.

Copy

When your company crosses 30, 40, or 50 employees, appreciation starts needing structure.

EzRewards is built for companies that want to move beyond manual rewards, scattered recognition, and spreadsheet-driven tracking.

Use Cases

- Startups building strong culture early
 - IT and services companies managing distributed teams
 - SaaS companies scaling people operations
 - Agencies and consulting firms rewarding project excellence
 - Mid-sized companies formalizing employee engagement
-

Section 8: Why EzRewards

Headline

Not another gift-card tool. A system for appreciation.

Copy

EzRewards combines recognition, rewards, wallet, reports, and AI-assisted insights into one product.

It helps companies move from occasional rewards to an always-on appreciation culture.

Differentiation Points

Recognition-first

Rewards are powerful, but recognition builds culture. EzRewards supports both.

Wallet-backed control

Admins can fund rewards, track usage, and manage redemptions clearly.

Built-in visibility

Reports help teams understand participation, trends, and usage.

AI-assisted reporting

Admins can ask questions instead of manually decoding every report.

Designed for modern teams

Premium experience, clean workflows, and scalable admin controls.

Section 9: Waitlist CTA

Headline

Be among the first companies to try EzRewards.

Copy

We are opening early access for selected teams that want to make employee appreciation more visible, structured, and rewarding.

Join the waitlist and we'll reach out when early access opens.

Form Fields

- Full name
- Work email
- Company name

- Company size
- Role
- Phone number, optional
- Message, optional

CTA Button

Join the Waitlist

3. Product Page Structure and Copy

Hero

Headline

One platform to recognize, reward, and understand your people.

Subheadline

EzRewards brings employee recognition, rewards, wallet management, reports, and AI-assisted insights into one modern product.

CTA

Join the Waitlist

Section: Recognition

Headline

Make great work visible.

Copy

With EzRewards, employees can recognize teammates through public appreciation posts, badges, messages, reactions, and comments.

Recognition becomes part of the company's visible culture instead of staying hidden in private chats.

Feature Points

- Peer-to-peer recognition
- Badge-based appreciation
- Public recognition feed
- Reactions and comments
- Recognition history

Section: Rewards

Headline

Reward contributions without operational chaos.

Copy

Admins can manage digital rewards through a wallet-backed redemption system. Employees can redeem vouchers while admins track usage and history.

Feature Points

- Digital voucher redemption
- Reward catalogue
- Wallet-backed redemption
- Redemption history
- Success and failure tracking

Section: Wallet

Headline

Control reward spending with a dedicated wallet.

Copy

The EzRewards wallet helps companies fund employee rewards, track wallet balance, view recharge history, and monitor utilization.

Feature Points

- Wallet recharge
 - Balance tracking
 - Recharge history
 - Utilization tracking
 - Low balance visibility
-

Section: Reports

Headline

See how appreciation moves across your company.

Copy

Reports help admins understand recognition activity, employee participation, wallet usage, voucher redemption, and engagement trends.

Feature Points

- Employee reports
 - Recognition reports
 - Wallet reports
 - Redemption reports
 - Usage insights
-

Section: AI Report Assistant

Headline

Talk to your reports.

Copy

The AI Report Assistant lets admins ask questions about structured report data and get direct answers.

Instead of manually scanning tables, admins can ask what they need to know.

Example Questions

- "Which team recognized the most people?"
 - "Who received the most recognition?"
 - "Which vouchers were redeemed the most?"
 - "How many users are active?"
-

4. Pricing Page Structure and Copy

Hero

Headline

Simple pricing for growing teams.

Subheadline

EzRewards is currently opening early access for selected companies. Pricing will be shared with teams that join the waitlist.

CTA

Join the Waitlist

Section: What Pricing Includes

Headline

Built to support your complete appreciation workflow.

Included Capabilities

- Employee recognition
- Digital rewards
- Company wallet
- Voucher redemption
- Admin controls

- Reports
 - AI Report Assistant
-

Section: Why Pricing Is Not Public Yet

Headline

Early access, tailored onboarding.

Copy

We are working with early companies closely to understand team size, use cases, reward workflows, and onboarding requirements.

Join the waitlist and our team will reach out with access details.

5. About Page Structure and Copy

Hero

Headline

We believe appreciation should not be an afterthought.

Subheadline

EzRewards is built for companies that want to make recognition visible, rewards effortless, and employee appreciation part of everyday work.

Section: Our Belief

Headline

Good work deserves to be seen.

Copy

As companies grow, appreciation becomes harder to manage. Great contributions get missed. Rewards become manual. Culture becomes difficult to measure.

EzRewards was created to help companies build a structured, visible, and scalable appreciation system.

Section: What We Are Building

Headline

A modern operating system for appreciation.

Copy

EzRewards brings recognition, rewards, wallet management, reports, and AI-assisted insights into one product experience.

It is designed for companies that want appreciation to be simple for employees, controlled for admins, and visible for leadership.

Section: Footer Mention

Copy

EzRewards is built as an Evolutyz product.

8. Suggested Microcopy

CTA Options

- Join the Waitlist
- Request Early Access
- Explore Product
- Talk to Us
- See How It Works

Short Headlines

- Appreciation, redesigned.
- Recognition that does not disappear.
- Rewards without spreadsheet chaos.
- Ask your reports. Get answers.
- Built for teams that are growing fast.
- Make appreciation visible.

- Fund rewards. Track usage. Stay in control.
- Give culture a system.

Form Helper Text

- Use your work email so we can verify your company details.
 - We're currently onboarding selected early access teams.
 - Pricing details will be shared with waitlisted companies.
-

9. Design Notes for Web Designer

Overall Feel

The website should feel like a premium SaaS product with CRED-inspired neo-pop details.

It should not look like a traditional HR software website.

The experience should feel:

- Dark
- Sharp
- Premium
- Bold
- High contrast
- Product-led
- Modern
- Slightly playful

Suggested Color Direction

Dark Theme

- Deep black / charcoal base
- Electric blue, purple, lime, or neon accents
- Soft gradients
- Glass cards
- Bright CTA buttons
- Metallic or premium highlight effects

Bright Theme

- Off-white / soft grey base
- Bold colorful cards
- Neo-pop shadows
- Accent gradients

- High-contrast typography

Typography Direction

- Large, bold hero text
- Sharp section headlines
- Clean body copy
- Strong contrast between headline and supporting text

UI Visuals to Create

The designer should create visual product cards such as:

- Recognition feed card
- Wallet balance card
- Voucher redemption card
- AI Report Assistant chat card
- Admin dashboard card
- Report insight card

Motion Ideas

Optional but useful:

- Floating recognition cards
- Animated wallet balance
- Chat assistant typing animation
- Voucher card hover
- Report insight cards sliding in
- CTA glow or pulse

10. Suggested Above-the-Fold Layout

Left Side

Headline:

The operating system for employee appreciation.

Subheadline:

Recognize great work, reward employees, manage voucher redemptions, and understand appreciation trends from one modern platform.

CTA:

Join the Waitlist

Secondary CTA:

Explore Product

Right Side

Stacked floating cards:

1. Recognition Card
"Riya recognized Arjun for Ownership"
 2. Wallet Card
"Wallet Balance: ₹1,24,500"
 3. AI Assistant Card
"Which team had the highest recognition this month?"
 4. Report Card
"Engineering leads with 326 recognitions"
-

11. Final Website Positioning Statement

EzRewards is the operating system for employee appreciation. It helps growing companies recognize great work, reward employees, manage voucher-based redemptions, and understand appreciation trends through reports and AI-assisted insights. Built for teams that have outgrown manual rewards and scattered recognition, EzRewards makes appreciation visible, structured, and effortless.
